A *Transformative Approach* to Unlocking Value

STRATEGY

A concentrated, smid cap contrarian value strategy focused on underperforming companies taking transformative actions to unlock the hidden value within.

PHILOSOPHY

We believe the best opportunities to add alpha are event-driven: turnarounds, restructurings and transformations. We search for out of favor companies with "hidden jewels" that are selling at large discounts to their future restructured earnings power. Our discipline leads us to research and value individual business segments with an opportunity for smart, motivated management teams to fix, restructure and grow the company to unleash higher earnings that ultimately lead to higher stock prices.

ROLE IN PORTFOLIO

- Enhances passive strategies through delivering high active share and differentiated holdings
- Complements more traditional growth/value equity strategies
- Long-term investment horizon and low portfolio turnover

DIFFERENTIATED APPROACH

Unlike many value managers, who generate investment ideas by screening traditional valuation metrics, we start by finding underperforming companies implementing strategic changes to unlock value and future growth potential. This differentiated discovery process has historically led to high active share for our strategy.

Portfolio Allocation

Our proprietary research process identifies companies considered underachievers: underperforming, diversified companies where low-return divisions are masking the profitability of good businesses elsewhere in the company ("hidden jewels").

Extensive fundamental analysis of segment values and restructuring opportunities, combined with meetings with senior management, enable us to value the businesses, evaluate management's ability to execute the required changes, and to project the future earnings power of a company. The chart below shows the types of transformations and restructurings we invest in, and how those are distributed within our portfolio.

* The Russell 2500 Value Index is a copyright of FTSE Russell. The Index is unmanaged and cannot be invested in directly. It includes the reinvestment of dividends and income, but does not reflect fees, brokerage commissions or other expenses of investig. The Russell 2500 Value Index measures the performance of the Smid Cap value segment of the U.S. equity universe. It includes those Russell 2500 Index companies with lower price-to-book ratios and lower forecasted growth values. Material differences exist between Sasco Capital's composite investment strategy and the Russell 2500 Value Index, due to Sasco Capital's contrarian value focus.
